Student Intern Mangaluru

– Collaborated within a team and analyzed the problem statement, "Application for Assessment of Quality of Textbook/Reference Books/E-Books," which aims to help Ayurvedic students choose the best referential E-books.

PROJECTS

–Fauna Facilty Management *Mar 2024*

Database management project that streamlines the handling of Wildlife park,Visitors and Tickets

* Tools & technologies used: HTML,PHP,MYSQL,JavaScript
* The efficient management of visitor and animal data is the goal of the Fauna Facility Management system. It effortlessly manages ticketing and categorizes visitors as either Indian or international. The system makes sure that data is stored in an organized manner, makes it easier to retrieve, and improves the general management of wildlife facilities.

–Braille System That Navigates Fun Learning *Mar 2024*

An educational platform designed to help visually impaired students engage in the field of information technology.

* Tools & technologies used: HTML,CSS,JavaScript
* With the help of this project, visually challenged students can now learn programming languages on an accessible platform.It breaks down obstacles in education and empowers students to confidently explore programming languages by utilizing assistive technologies like voice navigation, keyboard shortcuts, and audio output to promote active engagement and skill development.
